

日本国籍を持つ学生／日本国内居住中の留学生は回答不要です。
Students with Japanese citizenship and international students currently
living in Japan need not fill out this form.

INSTRUCTIONS

OSAKA UNIVERSITY STUDENT HEALTH DATA FORM

Purpose

- Your health data on this form are used by Health and Counseling Center to provide you with better service and care in terms of your health management and promotion.
- Should you have any health concerns during your stay in Japan, the data will help us to detect their causes earlier and more accurately, and to support you either by ourselves, or in cooperation with faculty members of your department and medical institutions outside the campus. In case you are currently seeing a doctor and/or on medication, the data are essential for us to help you continue necessary treatment and medication in Japan.
- The data are kept strictly confidential and only used by Health and Counseling Center for the purposes above, except in:
 1. emergency situations in which safety of yourself and/or others are in jeopardy
 2. situations where we consider it serves your support and/or treatment to share the information with other people involved (e.g., faculty members of your department, medical institutions outside campus), in which case, we will ask for your permission first.
- Your cooperation with this health data form is optional.

Procedure

- Fill out all sections of this form.
- If possible, visit your primary physicians/healthcare providers, and get them to check and endorse the form.
- If you are currently seeing a doctor, and/or on prescribed medications, bring us a letter of referral from your doctor, in addition to this form.

Submission & Deadline

- Digitalize the completed form to pdf/jpeg format file.
- Upon coming to Japan and acquiring OU Mail account, click the link or read the QR code below and upload the file.

Vaccinations

- In Japan, most people get vaccinations of measles, german measles, chicken pox, and mumps in their childhood. We strongly recommend that you get these vaccinations before you come to Japan. Also, we advise that you vaccinate against meningococcus, especially if you plan group living (dormitories, extracurricular activities, etc.) It will be costly to get these vaccinations in Japan.
