

Sports Event

The fall / winter semester has started, and we held a sporting event with infection control measures. We planned to have both volleyball and badminton, but due to the strong wind, badminton was not able to push through.

Even though we struggled against strong winds, we all were able to enjoy volleyball for the first time in a while.

The event ended because it became dark outside and difficult to see the ball, but many students enjoyed the event, so much that some were wondering when the next event would be held.

Students who don't usually attend the Science Buddy event also participated and made new friends.
